Summary

I'm currently pursuing a B.Tech degree in Computer Science And Engineering with a focus on software engineering at Dr. APJ Abdul Kalam Technical University (formerly AKTU) in Lucknow. My ultimate goal is to become a skilled software engineer, but I'm also passionate about designing and deploying projects on cloud services like Google Cloud Platform (GCP). I love exploring new coding techniques, experimenting with different tools, and working on user interface, user experience and SEO.

When I'm not coding, I love teaching others what I know. I believe that sharing my knowledge not only helps others, but it also deepens my own understanding of the material. I also enjoy participating in coding communities and hackathons to learn new approaches and connect with other software engineers. My diverse interests and skillset make me a valuable candidate for any team looking to innovate and create in the tech industry.

In conclusion, I'm excited to continue honing my coding and design skills and am eager to take on new challenges in the field of software engineering. I believe that my passion for teaching, my experience in coding and design, and my interest in deploying projects on cloud platforms like GCP make me an excellent fit for any company looking to innovate and create in the tech industry.

Experience

Computer Science Mentor

Gayatri Raj Public School

Apr 2023 - Present (3 months)

Based On NEP 2020 Curriculum, I Started Teaching Students (HTML, CSS, Javascript, Python, Artificial Intelligence, DSA, Data Science, Microsoft 365, Google Workspace, Website Development, App Development, Canva/Adobe Photoshop/Adobe Animate).

IT Admin

Gayatri Raj Public School

Apr 2021 - Mar 2023 (2 years)

When I Was An IT Admin @ GRPS -
